

Secure Mobility and Data Solutions For The Connected Officer

Mobile Innovations solutions for mobile law enforcement empower your connected officers by optimizing their most powerful law enforcement tool– their smartphone – to connect with data, with each other and with your communities in safer and more streamlined ways.

By putting the sum of police knowledge at the connected officer's fingertips Mobile Innovations helps:

- Empower your officers
- Cut response times
- Improve analytics & safety
- Enhance collaboration
- Increase transparency

2-FA PKI Secured Niche RMS

A complete and secure mobile Records Management System solution that provides direct, speedy and secure CPIC and other federal database access. Meets strong PKI cert-based authentication standards for Android and iPhone with Entrust or Gemalto.

Electronic Pocket Notebook

Provides automatic time-stamped and geotagged entries for every lookup, query, check and plate run; every form filled out, and every interaction with the RMS gets automatically logged. Notes can be added manually, as required.
